

BRP INC.
**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS**
FOR THE THREE-MONTH PERIOD ENDED APRIL 30, 2014

The following management's discussion and analysis ("MD&A") provides information concerning financial condition and results of operations of BRP Inc. (the "Company" or "BRP") for the first quarter of the fiscal year ending January 31, 2015. This MD&A should be read in conjunction with the unaudited condensed consolidated interim financial statements for the three-month period ended April 30, 2014 and the annual consolidated financial statements and MD&A for the year ended January 31, 2014. Some of the information contained in this discussion and analysis contains forward-looking statements that involve risks and uncertainties. Actual results may differ materially from underlying forward-looking statements as a result of various factors, including those described in "Forward-Looking Statements" section of this MD&A. This MD&A reflects information available to the Company as at June 11, 2014.

Basis of Presentation

The unaudited condensed consolidated interim financial statements of the Company have been prepared in accordance with International Financial Reporting Standards ("IFRS") and in accordance with IAS 34 "Interim Financial Reporting". All amounts presented are in Canadian dollars unless otherwise indicated. The Company's fiscal year is the twelve-month period ending January 31. All references in this MD&A to "Fiscal 2015" are to the Company's fiscal year ending January 31, 2015, to "Fiscal 2014" are to the Company's fiscal year ended January 31, 2014 and to "Fiscal 2013" are to the Company's fiscal year ended January 31, 2013.

This MD&A, approved by the Board of Directors on June 11, 2014, is based on the Company's unaudited condensed consolidated interim financial statements and accompanying notes thereto for the three-month periods ended April 30, 2014 and 2013.

The Company's Seasonal Products consist of snowmobiles, personal watercraft (referred to as "PWCs") and sport boat (which the Company ceased to manufacture in September 2012); the Company's Year-Round Products consist of all-terrain vehicles (referred to as "ATVs"), side-by-side vehicles (referred to as "SSVs") and roadsters; and the Company's Propulsion Systems consist of outboard and jet boat engines, kart, motorcycle and recreational aircraft engines sold to third parties. The Company's "PAC" business includes parts, accessories and clothing and other services sold to third parties.

Forward-Looking Statements

Certain statements in this MD&A about the Company's current and future plans, expectations and intentions, results, levels of activity, performance, goals or achievements or any other future events or developments constitute forward-looking statements. The words "may", "will", "would", "should", "could", "expects", "plans", "intends", "trends", "indications", "anticipates", "believes", "estimates", "predicts", "likely" or "potential" or the negative or other variations of these words or other comparable words or phrases, are intended to identify forward-looking statements.

Forward-looking statements are based on estimates and assumptions made by the Company in light of its experience and perception of historical trends, current conditions and expected future developments, as well as other factors that the Company believes are appropriate and reasonable in the circumstances, but there can be no assurance that such estimates and assumptions will prove to be correct.

Many factors could cause the Company's actual results, level of activity, performance or achievements or future events or developments to differ materially from those expressed or implied by the forward-looking statements, including, without limitation, the following factors: impact of adverse economic conditions on consumer spending; decline in social acceptability of the Company's products; fluctuations in foreign currency exchange rates; high levels of indebtedness; unavailability of additional capital; unfavourable weather conditions; seasonal sales fluctuations; the Company's ability to comply with product safety, health, environmental and noise pollution laws; dependence on dealers, distributors, suppliers, financing sources and other strategic partners who may be sensitive to economic conditions; large fixed cost base; inability of Company's dealers and distributors to secure adequate access to capital; supply problems, termination or interruption of supply arrangements or increases in the cost of materials; covenants in the Company's financing and other material agreements; competition in product lines; loss of the service of members of management team or employees who possess specialized market knowledge and technical skills; inability to maintain and enhance reputation and brands; adverse determination in any significant product liability claim against the Company; significant product repair and/or replacement due to product warranty claims or product recalls; reliance on a network of independent dealers and distributors to manage the retail distribution of its products; dependence on customer relationships for the sale of original equipment manufacturer products; unsuccessful management of inventory levels; risks associated with international operations; inability to enhance existing products and develop and market new products; inability to protect its intellectual property; failure of information technology systems; declining prices for used versions of products and oversupply by competitors; unsuccessful execution of manufacturing strategy; changes in tax laws and unanticipated tax liabilities; higher fuel costs; deterioration in relationships with employees; pension plan liabilities; natural disasters; failure to carry proper insurance coverage. These factors are not intended to represent a complete list of the factors that could affect the Company; however, these factors should be considered carefully.

The purpose of the forward-looking statements is to provide the reader with a description of management's expectations regarding the Company's financial performance and may not be appropriate for other purposes; readers should not place undue reliance on forward-looking statements made herein. Furthermore, unless otherwise stated, the forward-looking statements contained in this MD&A are made as of the date of this MD&A and the Company has no intention and undertakes no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by applicable securities regulations. The forward-looking statements contained in this MD&A are expressly qualified by this cautionary statement.

Non-IFRS Measures

This MD&A makes reference to certain non-IFRS measures. These measures are not recognized measures under IFRS, do not have a standardized meaning prescribed by IFRS and are therefore unlikely to be comparable to similar measures presented by other companies. Rather, these measures are provided as additional information to complement those IFRS measures by providing further understanding of the Company's results of operations from management's perspective. Accordingly, they should not be considered in isolation nor as a substitute for analysis of the Company's financial information reported under IFRS. The Company uses non-IFRS measures including EBITDA, Normalized EBITDA, Normalized Net Income, Normalized basic earnings per share and Normalized diluted earnings per share to provide investors with supplemental measures of the Company's operating performance. The Company believes non-IFRS measures are important supplemental measures of operating performance because they eliminate items that have less bearing on the Company's operating performance and thus highlight trends in its core business that may not otherwise be apparent when relying solely on IFRS measures. The Company also believes that securities analysts, investors and other interested parties frequently use non-IFRS measures in the evaluation of companies, many of which present similar metrics when reporting their results. Management also uses non-IFRS measures in order to facilitate operating performance comparisons from period to period, prepare annual operating budgets and assess the Company's ability to meet its future debt service, capital expenditure and working capital requirements. Because other companies may calculate these non-IFRS measures differently than the Company does, these metrics are not comparable to similarly titled measures reported by other companies. The Company refers the reader to the "Selected Consolidated Financial Information" section of this MD&A for the definitions and reconciliations of EBITDA, Normalized EBITDA and Normalized Net Income presented by the Company to the most directly comparable IFRS measure.

Overview

BRP is a global leader in the design, development, manufacturing, distribution and marketing of powersports vehicles and propulsion systems. The Company's diversified portfolio of brands and products includes *Ski-Doo* and *Lynx* snowmobiles, *Sea-Doo* PWCs, *Can-Am* ATVs, SSVs and roadsters, and propulsion systems composed of *Evinrude* outboard engines and *Rotax* engines for jet boats, karts, motorcycles and recreational aircraft. Additionally, the Company supports its line of products with a dedicated PAC business.

The Company employs approximately 7,100 people mainly in manufacturing and distribution sites in Canada, Mexico, Austria, the United States and Finland. The Company sells its products in 105 countries. The products are sold directly through a network of approximately 3,200 dealers in 20 countries as well as through approximately 190 distributors serving approximately 950 additional dealers.

Over its history, the Company has promoted a portfolio of globally recognized brands and products that achieved market leading positions, establishing the Company as a brand of choice for true powersports enthusiasts. *Ski-Doo* and *Sea-Doo*, through decades of sustained product innovation and development, have become synonymous with snowmobiles and PWCs. Over the years, the Company has successfully leveraged its market leading position and reputation to develop renowned brands such as *Can-Am*, *Evinrude*, *Rotax* and *Lynx*, which are also known for high quality and innovation.

Highlights of the three-month period ended April 30, 2014

For the three-month period ended April 30, 2014, the Company's financial performance was the following when compared to the first quarter ended April 30, 2013:

- Revenues of \$758.6 million, a decrease of \$45.7 million;
- Gross profit of \$173.4 million representing 22.9% of revenues, a decrease of \$44.6 million;
- Normalized EBITDA of \$56.6 million representing 7.5% of revenues, a decrease of \$51.2 million;
- Net income of \$28.0 million, an increase of \$2.3 million, which resulted in basic earnings per share of \$0.24, a decrease of \$0.01 per share;
- Normalized net income of \$16.6 million, a decrease of \$36.8 million, which resulted in normalized basic earnings per share of \$0.14, a decrease of \$0.38 per share.

In addition, following the three-month period ended April 30, 2014:

- The Company announced its decision to reinforce its presence in Mexico by investing in a new facility in Juárez, Mexico, to increase its *Can-Am* product offering and meet future demand in off-road products. This represents an investment of an estimated amount of \$55 million over the next three fiscal years.

Factors Affecting the Company's Results of Operations

Revenues and Sales Program Costs

The Company's revenues are derived primarily from the wholesale activities of the Company's manufactured vehicles, including Seasonal Products, Year-Round Products, as well as Propulsion Systems and related PAC to dealers and distributors. Revenue recognition normally occurs when products are shipped to dealers or distributors from the Company's facilities.

In order to support the wholesale activities of the Company and the retail activities of dealers and distributors, the Company provides support in the form of various sales programs consisting of cash and non-cash incentives. The cash incentives consist mainly of rebates given to dealers, distributors and consumers, volume discounts to dealers and distributors, free or extended coverage period under dealer and distributor inventory financing programs and retail financing programs. The cost of these cash incentives is recorded as a reduction of revenues. The non-cash incentives consist mainly of extended warranty coverage or free PAC. The cost of these non-cash incentives is recorded in cost of sales.

The support provided to dealers, distributors and consumers tends to increase when general economic conditions are difficult, when changing market conditions require the launch of new or more aggressive programs or when dealer and distributor inventory is above appropriate levels.

Under dealer and distributor inventory financing arrangements, the Company could be required to repossess new and unused products in certain cases of default by dealers or distributors. The cost of repossession tends to increase when dealers or distributors are facing challenging and prolonged difficult retail conditions and when their inventory level is high. During the last fiscal year and current fiscal year, the Company did not experience significant product returns from its limited repossession guarantee provided to financing companies in connection with the dealer and distributor inventory financing arrangements. Refer to the “Off-Balance Sheet Arrangements” section of this MD&A for more information on dealer and distributor inventory financing arrangements.

Commodity Costs

Approximately 70% of the Company’s cost of sales consists of material used in the manufacturing process. Therefore, the Company is exposed to the fluctuation of prices of certain raw materials such as aluminum, steel, plastic, resins, stainless steel, copper, rubber and certain rare earth metals. Additionally, the Company is exposed to fuel price fluctuations related to its procurement and distribution activities. The Company does not hedge its exposure to the fluctuation of prices of raw materials and fuel. Therefore, an increase in commodity prices could negatively impact the Company’s operating results if it is not able to transfer these cost increases to dealers, distributors or consumers.

Warranty Costs

The Company’s manufacturer product warranties generally cover periods ranging from 6 months to 3 years for most products. In certain circumstances, the Company provides extended warranty coverage as a result of sales programs, under certain commercial accounts, or as required by local regulations. During the warranty period, the Company reimburses dealers and distributors the entire cost of repair or replacement performed on the products (mainly composed of parts or accessories provided by the Company and labour costs incurred by dealers or distributors). In addition, the Company sells in the normal course of business and provides under certain sales programs, extended product warranties.

During its product development process, the Company ensures that high quality standards are maintained at each development stage of a new product. This includes the development of detailed product specifications, the evaluation of the quality of the supply chain and the manufacturing methods and detailed testing requirements over the development stage of the products. Additionally, product quality is ensured by quality inspections during and after the manufacturing process.

The Company records a warranty provision when products are sold. Management believes that, based on available information, the Company has adequate provisions to cover any future warranty or extended warranty claims on products sold. However, future claim amounts can differ significantly from provisions that are recorded in the consolidated statement of financial position.

Foreign Exchange

The Company’s revenues and sales program costs are reported in Canadian dollars but are mostly generated in U.S. dollars, Canadian dollars and Euros. The Company’s revenues reported in Canadian dollars are to a lesser extent exposed to foreign exchange fluctuations with the Australian dollar, the Brazilian Real, the Swedish Krona and the Norwegian Krone. The costs incurred by the Company are mainly denominated in Canadian dollars, U.S. dollars and Euros and to a lesser extent in Mexican pesos. Therefore recorded revenues, gross profit and operating income in Canadian dollars are exposed to foreign exchange fluctuations. The Company’s manufacturing facilities are located in several different countries which helps mitigate some of its foreign currency exposure.

The Company's has an outstanding U.S. \$792.0 million under its U.S. \$1,050.0 million term facility agreement (the "Term Facility" or the "Term Credit Agreement") which results in gain or loss in net income when the U.S. dollar/Canadian dollar exchange rate at the end of the period is different from the opening period rate. Additionally, the Company's interest expense on the Term Facility is exposed to U.S. dollar/Canadian dollar exchange rate fluctuations. The Company does not currently hedge these exposures, and therefore, an increase of the U.S. dollar against the Canadian dollar could negatively impact the Company's net income.

For further details relating to the Company's exposure to foreign currency fluctuations, see "Financial Instruments – Foreign Exchange Risk" section of this MD&A.

Net Financing Costs (Financing Costs less Financing Income)

Net financing costs are incurred principally on long-term debt, defined benefit pension plan liabilities and revolving credit facilities. As at April 30, 2014, the Company's long-term debt of \$895.1 million was mainly comprised of the Term Facility which bears interest at LIBOR plus 3.00% with a floor rate on the LIBOR of 1.00%. Due to current LIBOR rates level and the current low volatility environment, while taking into account the LIBOR floor rate on the Term Facility, the Company does not believe to be significantly exposed to increased interest rates in the short-term.

Income Taxes

The Company is subject to federal, state and provincial income taxes in jurisdictions in which it conducts business. The Canadian income tax statutory rate was 26.9% for the three-month period ended April 30, 2014. However, the Company's effective consolidated tax rate is influenced by the mix of accounting profits or losses before income tax among tax jurisdictions, the foreign exchange gain or loss on the Term Facility recorded in Canada, and the foreign exchange impact of foreign subsidiaries having the Canadian dollar as functional currency. The Company expects to pay cash taxes in all tax jurisdictions for the fiscal year ending January 31, 2015, except in Canada and the United States where the Company plans to utilize its tax attributes to offset taxable income or income taxes payable.

Seasonality

The Company's revenues and operating income experience substantial fluctuations from quarter to quarter. In general, wholesale sales of the Company's products are highest in the period immediately preceding and during their particular season of use. However, the mix of product sales may vary considerably from time to time as a result of changes in seasonal and geographic demand, the introduction of new products and models and production scheduling for particular types of products. As a result, the Company may not be able to accurately predict its quarterly revenues and operating income and the Company's results are likely to fluctuate significantly from period to period.

Selected Consolidated Financial Information

The selected consolidated financial information set out below for the three-month periods ended April 30, 2014 and 2013, has been derived from the unaudited condensed consolidated interim financial statements and related notes issued June 11, 2014.

Net Income data

| (in millions of Canadian dollars) | Three-month periods ended | |
|--|---------------------------|-------------------|
| | April 30, 2014 | April 30, 2013 |
| Revenues by category | | |
| Seasonal Products | \$ 184.6 | \$ 206.7 |
| Year-Round Products | 365.4 | 404.7 |
| Propulsion Systems | 97.3 | 92.9 |
| PAC | 111.3 | 100.0 |
| Total Revenues | 758.6 | 804.3 |
| Cost of sales | 585.2 | 586.3 |
| Gross profit | 173.4 | 218.0 |
| <i>As a percentage of revenues</i> | 22.9% | 27.1% |
| Operating expenses | | |
| Selling and marketing | 67.3 | 65.3 |
| Research and development | 41.6 | 37.3 |
| General and administrative | 36.8 | 35.0 |
| Other operating income | (0.7) | (5.7) |
| Total operating expenses | 145.0 | 131.9 |
| Operating income | 28.4 | 86.1 |
| Net financing costs | 13.6 | 16.9 |
| Foreign exchange (gain) loss on long-term debt | (12.3) | 8.3 |
| Increase in fair value of common shares | — | 19.6 |
| Income before income taxes | 27.1 | 41.3 |
| Income taxes expense (recovery) | (0.9) | 15.6 |
| Net income | \$ 28.0 | \$ 25.7 |
| Attributable to shareholders | \$ 28.0 | \$ 25.7 |
| Attributable to non-controlling interest | — | — |
| EBITDA ^[1] | \$ 55.0 | \$ 87.6 |
| Normalized EBITDA ^[1] | 56.6 | 107.8 |
| Normalized net income ^[1] | 16.6 | 53.4 |

^[1] For a reconciliation of net income to EBITDA, Normalized EBITDA and Normalized Net Income, see the Reconciliation Tables herein.

EBITDA, Normalized EBITDA and Normalized Net Income are non-IFRS measures that the Company uses to assess its operating performance. EBITDA is defined as net income before financing costs, financing income, income taxes expense (recovery), depreciation expense and foreign exchange (gain) loss on long-term debt. Normalized EBITDA is defined as net income before financing costs, financing income, income taxes expense (recovery), depreciation expense, foreign exchange (gain) loss on long-term debt, increase in fair value of common shares and unusual and non-recurring items. Normalized Net Income is defined as net income before foreign exchange (gain) loss on long-term debt, increase in fair value of common shares and unusual and non-recurring items adjusted to reflect the tax effect on these items. See "Non-IFRS Measures" section.

Financial Position data

As at

| (in millions of Canadian dollars) | April 30, 2014 | January 31, 2014 |
|--|-------------------|---------------------|
| Cash | \$ 76.9 | \$ 75.4 |
| Net working capital ^[1] | 102.9 | 97.1 |
| Property, plant and equipment | 518.2 | 515.3 |
| Total assets | 2,019.7 | 1,951.2 |
| Revolving credit facilities | — | 10.5 |
| Total non-current financial liabilities | 917.9 | 915.7 |
| Total liabilities | 2,036.7 | 1,992.0 |
| Deficit | (17.0) | (40.8) |

^[1] Net working capital is defined as the total current assets excluding cash less the total current liabilities excluding carrying amount of revolving credit facilities and current portion of long-term debt.

Other Financial data

| (in millions of Canadian dollars, except per share data) | Three-month periods ended | |
|--|---------------------------|-------------------|
| | April 30, 2014 | April 30, 2013 |
| Revenues by geography | | |
| United States | \$ 375.6 | \$ 412.9 |
| Canada | 126.8 | 145.0 |
| International ^[1] | 256.2 | 246.4 |
| | \$ 758.6 | \$ 804.3 |
| Weighted average number of shares | 118,179,487 | 102,960,700 |
| Weighted average number of shares – diluted | 118,939,914 | 104,052,400 |
| Earnings per share – basic | \$ 0.24 | \$ 0.25 |
| Earnings per share – diluted | 0.24 | 0.25 |
| Normalized earnings per share – basic ^[2] | 0.14 | 0.52 |
| Normalized earnings per share – diluted ^[2] | 0.14 | 0.51 |

^[1] International is defined as all jurisdictions except the United States and Canada.

^[2] Normalized earnings per share - basic and normalized earnings per share – diluted are calculated respectively by dividing the normalized net income by the weighted average number of shares – basic and the weighted average number of shares – diluted.

As per IFRS requirements, the weighted average number of shares outstanding for the three-month period ended April 30, 2013 has been calculated taking into account the consolidation of the outstanding shares on 3.765 to one basis that occurred on May 29, 2013, as part of the initial public offering of the Company's subordinate voting shares (the "IPO").

Reconciliation Tables

The following table presents the reconciliation of net income to EBITDA, Normalized EBITDA and Normalized net income.

| (in millions of Canadian dollars) | Three-month periods ended | |
|---|---------------------------|-------------------|
| | April 30, 2014 | April 30, 2013 |
| Net income | \$ 28.0 | \$ 25.7 |
| Financing costs | 14.1 | 18.1 |
| Financing income | (0.5) | (1.2) |
| Income taxes expense (recovery) | (0.9) | 15.6 |
| Depreciation expense | 26.6 | 21.1 |
| Foreign exchange (gain) loss on long-term debt | (12.3) | 8.3 |
| EBITDA | 55.0 | 87.6 |
| Increase in fair value of common shares | — | 19.6 |
| Unusual and non-recurring items | | |
| Restructuring costs reversal ^[1] | (0.4) | — |
| Reversal of gain from insurance recovery ^[2] | 1.4 | — |
| Other items ^[3] | 0.6 | 0.6 |
| Normalized EBITDA | 56.6 | 107.8 |
| Depreciation expense | (26.6) | (21.1) |
| Financing costs | (14.1) | (18.1) |
| Financing income | 0.5 | 1.2 |
| Income taxes (expense) recovery adjusted | 0.2 | (16.4) |
| Normalized net income | \$ 16.6 | \$ 53.4 |

^[1] During the three-month period ended April 30, 2014, the Company revised its estimates related to the exit of the sport boat business and reversed \$0.4 million of restructuring costs in net income that were previously recorded during the twelve-month period ended January 31, 2013.

^[2] During the three-month period ended April 30, 2014, as a result of obtaining additional information, the Company revised its estimates related to the estimated insurance recovery in relation with the property, plant and equipment damaged by the explosion that occurred at the Company's research & development centre in Valcourt, Canada during Fiscal 2013 and reversed in net income \$1.4 million of the gain that was previously recorded during the twelve-month period ended January 31, 2013.

^[3] Other unusual and non-recurring items include retention salaries related to the transfer of the assembly of PWC from Canada to Mexico and the assignment of the PAC distribution to third-party logistics providers. The retention salaries totalled \$0.6 million for the three-month periods ended April 30, 2014 and April 30, 2013.

Results of operations

Analysis of Results for the first quarter of Fiscal 2015

The following section provides an overview of the financial performance of the Company for the three-month period ended April 30, 2014 compared to the same period ended April 30, 2013.

Revenues

Revenues decreased by \$45.7 million, or 5.7%, to \$758.6 million for the three-month period ended April 30, 2014, compared with \$804.3 million for the corresponding period ended April 30, 2013. The revenue decrease was mainly due to lower wholesale in Year-Round Products and to lower wholesale and unfavourable mix in Seasonal Products. The decrease in revenues was partially offset by a favourable foreign exchange rate variation of \$49 million mainly related to the strengthening of the U.S. dollar and the Euro against the Canadian dollar.

The Company's North American retail sales for the three-month period ended April 30, 2014 remained at the same level of the corresponding period ended April 30, 2013. However, as at April 30, 2014, North American dealer inventories decreased on a percentage basis by low-single digit compared to April 30, 2013, mainly due to an historically low inventory level of snowmobiles.

Significant trends by category were as follows:

Seasonal Products

Revenues from Seasonal Products decreased by \$22.1 million, or 10.7%, to \$184.6 million for the three-month period ended April 30, 2014, compared with \$206.7 million for the corresponding period ended April 30, 2013. The reduction resulted primarily from a decrease of traditional PWC volume partly offset by the new entry level *Sea-Doo Spark*. The decrease of volume was attributable to a longer than anticipated production ramp-up at the Queretaro, Mexico facility causing delivery delays of certain PWC products. The decrease in revenues was partially offset by a favourable foreign exchange rate variation of \$11 million.

North American Seasonal Products retail sales decreased on a percentage basis by low-single digit compared with the first quarter of Fiscal 2014. The decrease is primarily due to a timing in retail of snowmobiles between the current quarter and the last quarter of Fiscal 2014 as the retail was then up low-double digits; partially offset by a higher retail in PWC coming from the *Sea-Doo Spark*.

Year-Round Products

Revenues from Year-Round Products decreased by \$39.3 million, or 9.7%, to \$365.4 million for the three-month period ended April 30, 2014, compared with \$404.7 million for the corresponding period ended April 30, 2013. The decrease resulted primarily from lower shipments of SSVs due to the impact of the *Can-Am Maverick* models introduction in the corresponding period last year. To a lesser extent, the decrease was also attributable to ATVs mainly due to the decrease of volume sold in Russia, primarily driven by the political and economic instability in Eastern Europe. The decrease in revenues was partially offset by a favourable foreign exchange rate variation of \$22 million.

North American Year-Round Products retail sales remained at the same level as those for the first quarter of Fiscal 2014.

Propulsion Systems

Revenues from Propulsion Systems increased by \$4.4 million, or 4.7%, to \$97.3 million for the three-month period ended April 30, 2014, compared with \$92.9 million for the corresponding period ended April 30, 2013. The increase in revenues was mainly attributable to a favourable foreign exchange rate variation of \$9 million. The increase in sales related to the new jet propulsion system was more than offset by the lower volume of motorcycle engines sold.

PAC

Revenues from PAC increased by \$11.3 million, or 11.3%, to \$111.3 million for the three-month period ended April 30, 2014, compared with \$100.0 million for the corresponding period ended April 30, 2013. The increase was mainly attributable to a favourable foreign exchange rate variation of \$7 million and from a higher volume of PAC related to Seasonal Products due to better winter conditions in North America.

Significant geographical trends were as follows:

United States

Revenues from the United States decreased by \$37.3 million, or 9.0%, to \$375.6 million for the three-month period ended April 30, 2014, compared with \$412.9 million for the corresponding period ended April 30, 2013. The decrease was mainly driven by a lower Year-Round and Seasonal Products wholesale. The revenue decrease was partially offset by a positive foreign exchange impact of \$29 million due to the strengthening of the U.S. dollar against the Canadian dollar. The United States represented 49.5% and 51.3% of revenues during the three-month periods ended April 30, 2014 and 2013, respectively.

Canada

Revenues from Canada decreased by \$18.2 million, or 12.6%, to \$126.8 million for the three-month period ended April 30, 2014, compared with \$145.0 million for the corresponding period ended April 30, 2013. The decrease was mainly driven by a lower Year-Round and Seasonal Products wholesale. Canada represented 16.7% and 18.0% of revenues during the three-month periods ended April 30, 2014 and 2013, respectively.

International

Revenues from International increased by \$9.8 million, or 4.0%, to \$256.2 million for the three-month period ended April 30, 2014, compared with \$246.4 million for the corresponding period ended April 30, 2013. This increase primarily resulted from a favourable foreign exchange impact of \$20 million due to the strengthening of the Euro against the Canadian dollar, partially offset by lower wholesale in Russia due to the current political and economic instability in Eastern Europe. International represented 33.8% and 30.6% of revenues during the three-month periods ended April 30, 2014 and 2013, respectively.

Gross Profit

Gross profit decreased by \$44.6 million, or 20.5%, to \$173.4 million for the three-month period ended April 30, 2014, compared with \$218.0 million for the corresponding period ended April 30, 2013. Gross profit margin percentage decreased by 420 basis points to 22.9% from 27.1% for the three-month period ended April 30, 2013. The decrease in gross profit margin percentage was primarily due to lower wholesale in Year-Round and Seasonal Products, an unfavourable product mix in Seasonal Products, expenses related to the production ramp-up at the Queretaro, Mexico facility and to the transfer of PAC distribution to third-party logistics providers. The margin decrease was partially offset by a favourable foreign exchange rate variation of \$7 million.

Operating Expenses

Operating expenses increased by \$13.1 million, or 9.9%, to \$145.0 million for the three-month period ended April 30, 2014, compared with \$131.9 million for the three-month period ended April 30, 2013. This increase was mainly due to a negative foreign exchange impact of \$12 million.

Normalized EBITDA

Normalized EBITDA decreased by \$51.2 million, or 47.5%, to \$56.6 million for the three-month period ended April 30, 2014, compared with \$107.8 million for the three-month period ended April 30, 2013. The decrease was primarily due to lower wholesale in Year-Round and Seasonal Products, costs related to the production ramp-up at the Queretaro facility and to the transfer of PAC distribution. The decrease includes an unfavourable foreign exchange rate variation of \$5 million.

Net Financing Costs

Net financing costs decreased by \$3.3 million, or 19.5%, to \$13.6 million for the three-month period ended April 30, 2014, compared with \$16.9 million for the three-month period ended April 30, 2013. The decrease primarily resulted from lower interest expense on the Term Facility due to lower outstanding nominal amount and lower interest rates following the repayment and amendment of the Term Facility that occurred in May 2013.

Foreign Exchange

The key average exchange rates used to translate foreign-denominated revenues and expenses, excluding any effect of the Company's hedging program, were as follows for the three-month periods ended April 30, 2014 and 2013:

| | April 30, 2014 | April 30, 2013 |
|--------------|---------------------------|---------------------------|
| U.S. dollars | 1.1053 \$CA/\$US | 1.0164 \$CA/\$US |
| Euro | 1.5218 \$CA/Euro | 1.3353 \$CA/Euro |

The key period-end exchange rates used to translate foreign-denominated assets and liabilities were as follows:

| | April 30, 2014 | January 31, 2014 |
|--------------|---------------------------|-----------------------------|
| U.S. dollars | 1.0957 \$CA/\$US | 1.1119 \$CA/\$US |
| Euro | 1.5196 \$CA/Euro | 1.5011 \$CA/Euro |

When comparing the operating income and the income before income tax for the three-month period ended April 30, 2014 to the corresponding period ended April 30, 2013, the foreign exchange fluctuations impact was the following:

| | Foreign exchange (gain) loss |
|--|-------------------------------------|
| (millions of Canadian dollars) | Three-month period |
| Gross profit | \$ (6.9) |
| Operating expenses | 11.8 |
| Impact of foreign exchange fluctuations on operating income | 4.9 |
| Long-term debt | (20.6) |
| Net financing costs | 0.7 |
| Impact of foreign exchange fluctuations on income before income taxes | \$ (15.0) |

Income Taxes

Income taxes expense decreased by \$16.5 million to an income taxes recovery of \$0.9 million for the three-month period ended April 30, 2014, compared with an income taxes expense of \$15.6 million for the three-month period ended April 30, 2013. The decrease resulted primarily from lower operating income. The income taxes as a percentage of income before income taxes decreased to (3.3)% from 37.8% for the three-month period ended April 30, 2013. The decrease is primarily due to the non-taxable portion and the unrecognized tax benefit related to the foreign exchange loss on long-term debt and from lower non-deductible expenses related to the redeemable common shares of the Company due to their exchange as part of the IPO.

Net Income

Net income increased by \$2.3 million, or 8.9%, to \$28.0 million for the three-month period ended April 30, 2014, compared with \$25.7 million for the three-month period ended April 30, 2013. The increase was primarily due to a favourable exchange rate on the U.S. denominated long-term debt and to the conversion of the redeemable common shares to subordinate voting shares as part of the IPO. The increase was partially offset by a lower operating income.

Assessment of the Company's first quarter performance against the outlook

On March 28, 2014, the Company issued outlook for the first quarter ending April 30, 2014. The following table provides a comparison of the Company's performance reported for the quarter ended April 30, 2014, against the issued outlook for this quarter:

| | Outlook | Results |
|-------------------|----------------------------|----------------|
| Revenues | Decrease 5% to 10% | 5.7% decrease |
| Normalized EBITDA | Decrease approximately 50% | 47.5% decrease |

Summary of Consolidated Quarterly Results

| | Three-month periods ended | | | | | | | |
|--|---------------------------|------------------------|------------------------|---------------------|----------------------|---------------------------------------|---------------------------------------|------------------------------------|
| | April 30, 2014 | January 31, 2014 | October 31, 2013 | July 31, 2013 | April 30, 2013 | January 31, 2013 ^[1] | October 31, 2012 ^[1] | July 31, 2012 ^[1] |
| (millions of Canadian dollars, except per share data) | Fiscal 2015 | Fiscal 2014 | Fiscal 2014 | Fiscal 2014 | Fiscal 2014 | Fiscal 2013 | Fiscal 2013 | Fiscal 2013 |
| Revenues by category | | | | | | | | |
| Seasonal Products | \$ 184.6 | \$ 406.4 | \$ 382.5 | \$ 140.6 | \$ 206.7 | \$ 371.0 | \$ 276.2 | \$ 156.1 |
| Year-Round Products | 365.4 | 272.5 | 249.6 | 278.1 | 404.7 | 223.4 | 247.4 | 257.2 |

^[1] This quarter has been restated to reflect the application of the amendments to IAS 19 "Employee Benefits" standard as explained in Note 2a) of the audited consolidated financial statements for the year ended January 31, 2014.

^[2] In Fiscal 2015 and 2014, the Company reversed respectively \$0.4 million and \$1.6 million of the restructuring costs of \$26.0 million recorded during Fiscal 2013 related to the Company's decision to exit the sport boat business, to transfer the assembly of PWC from Canada to Mexico and to assign the PAC distribution to third-party logistics providers.

^[3] In Fiscal 2014, the Company reversed \$0.3 million of the impairment charge of \$7.1 million recorded during Fiscal 2013 following the Company's decision to exit the sport boat business.

^[4] In Fiscal 2015, the Company reversed \$1.4 million of the gain of \$11.0 million that was recorded in Fiscal 2014 for the estimated insurance recovery in relation with property, plant and equipment damaged by the explosion that occurred at the Company's research & development centre in Valcourt, Canada during Fiscal 2013.

^[5] Other items include retention salaries of \$0.6 million for Fiscal 2015, \$2.5 million for Fiscal 2014 and \$1.7 million for Fiscal 2013 related to the transfer of the assembly of PWC from Canada to Mexico and the assignment of the PAC distribution to third-party logistics providers. In Fiscal 2014, other items also include \$0.9 million of fees and expenses related to the two secondary offerings. In Fiscal 2014 and Fiscal 2013, the Company recorded respectively \$0.5 million and \$3.8 million of unusual gain related to the termination of the defined benefit plan coverage of approximately two-thirds of its Austrian employees.

^[6] In Fiscal 2014, the Company recorded a non-recurring depreciation charge of \$1.7 million related to the damaged assets of the Company's research & development centre in Valcourt, Canada following the explosion that occurred during Fiscal 2013.

Liquidity and Capital Resources

Liquidity

The Company's primary sources of cash consist of existing cash balances, operating activities and available borrowings under the Revolving Credit Facilities and Term Facility.

The Company's primary uses of cash are to fund operations, working capital requirements and capital expenditures in connection with product development and manufacturing infrastructure. The fluctuation of working capital requirements is primarily due to the seasonality of the Company's production schedule and product shipments. Working capital requirements typically peak during the second quarter of the fiscal year.

A summary of net cash flows by activities is presented below for the three-month ended April 30, 2014 and 2013:

| | Three-month periods ended | |
|--|---------------------------|-------------------|
| | April 30, 2014 | April 30, 2013 |
| (millions of Canadian dollars) | | |
| Net cash flows generated from operating activities | \$ 36.0 | \$ 112.4 |
| Net cash flows used in investing activities | (22.8) | (24.9) |
| Net cash flows used in financing activities | (9.3) | (534.9) |
| Effect of exchange rate changes on cash | (2.4) | (3.3) |
| Net increase (decrease) in cash | 1.5 | (450.7) |
| Cash at beginning of period | 75.4 | 542.4 |
| Cash at end of period | \$ 76.9 | \$ 91.7 |

Net Cash Flows Generated from Operating Activities

Net cash flows generated from operating activities totalled \$36.0 million for the three-month period ended April 30, 2014 compared with \$112.4 million for the three-month period ended April 30, 2013. The \$76.4 million decrease was mainly due to lower operating income and unfavourable changes in net working capital of \$39.4 million. The unfavourable changes in net working capital were primarily driven by higher level of Seasonal and Year-Round Products finished goods inventory.

Net Cash Flows Used in Investing Activities

Net cash flows used in investing activities totalled \$22.8 million for the three-month period ended April 30, 2014, a similar level of investments compared to \$24.9 million for the three-month period ended April 30, 2013.

Net Cash Flows Used in Financing Activities

Net cash flows used in financing activities totalled \$9.3 million for the three-month period ended April 30, 2014 compared with \$534.9 million for the three-month period ended April 30, 2013. The decrease in net cash flows used of \$525.6 million was mainly attributable to the distributions of \$529.1 million made to the Company's shareholders that occurred during the three-month period ended April 30, 2013.

Contractual Obligations

The following table summarizes the Company's significant contractual obligations as at April 30, 2014, including its commitments related to leasing contracts:

| (millions of Canadian dollars) | Less than 1 year | 1-3 years | 4-5 years | More than 5 years | Total amount |
|--|---------------------|-----------------|-----------------|----------------------|-------------------|
| Commitments | | | | | |
| Operating lease agreements | \$ 22.0 | \$ 40.5 | \$ 32.9 | \$ 86.6 | \$ 182.0 |
| Financial obligations | | | | | |
| Trade payables and accruals | 588.5 | — | — | — | 588.5 |
| Long-term debt (including interest) | 37.2 | 97.5 | 951.4 | 7.0 | 1,093.1 |
| Derivative financial instruments | 3.4 | — | — | 2.1 | 5.5 |
| Other financial liabilities (including interest) | 65.3 | 5.0 | 0.4 | 22.8 | 93.5 |
| | 694.4 | 102.5 | 951.8 | 31.9 | 1,780.6 |
| Total obligations | \$ 716.4 | \$ 143.0 | \$ 984.7 | \$ 118.5 | \$ 1,962.6 |

The Company enters into purchasing agreements with suppliers related to material used in production. These agreements are usually entered into before production begins and may specify a fixed or variable quantity of material to be purchased. Due to the uncertainty as to the amount and pricing of material that may be purchased, the Company is not able to determine with precision its commitments in connection with these supply agreements.

Management believes that the Company's operating activities and available financing capacity will provide adequate sources of liquidity to meet its short-term and long-term needs.

Capital Resources

Revolving Credit Facilities

As at April 30, 2014, the revolving credit facilities agreement provided the Company a maximum availability of \$350.0 million until May 2018 (the "Revolving Credit Facilities"). The Revolving Credit Facilities are subject to a borrowing base calculation, based on 75% of trade and other receivables and 50% of inventories. The Revolving Credit Facilities are available to finance working capital requirements and capital expenditures, or for other general corporate purposes.

As at April 30, 2014, the Company had no outstanding indebtedness under the Revolving Credit Facilities and the applicable cost of borrowing during the quarter was the following based on:

- (i) U.S. dollars at either
 - (a) LIBOR plus 2.50% per annum;
 - (b) U.S. Base Rate plus 1.50% per annum; or
 - (c) U.S. Prime Rate plus 1.50% per annum;
- (ii) Canadian dollars at either
 - (a) Bankers' Acceptances plus 2.50% per annum; or
 - (b) Canadian Prime Rate plus 1.50% per annum
- (iii) Euros at Euro LIBOR plus 2.50% per annum.

For future periods, the cost of borrowing could increase by up to 1.25% or decrease by 0.50% depending on the leverage ratio represented by the ratio of net debt to consolidated cash flows of the BRP's subsidiary Bombardier Recreational Products Inc.

In addition, the Company incurs commitment fees of 0.45% to 0.50% per annum on the undrawn amount of the Revolving Credit Facilities.

Under certain conditions, the Company is required to maintain a minimum fixed charges ratio in order to have full access to its Revolving Credit Facilities.

As at April 30, 2014, the Company had issued letters of credit for an amount of \$5.3 million under the Revolving Credit Facilities (\$8.3 million as at January 31, 2014). In addition, \$2.6 million of letters of credit were outstanding under other agreements as at April 30, 2014, (\$0.3 million as at January 31, 2014).

Term Facility

As at April 30, 2014, the Term Facility provided the Company an outstanding financing of U.S. \$792.0 million under its U.S. \$1,050.0 million agreement and the Company had the possibility to increase the amount of borrowing by U.S. \$150.0 million under certain conditions. The cost of borrowing under the Term Facility was the following as at April 30, 2014:

- (i) LIBOR plus 3.00% per annum, with a LIBOR floor of 1.00%;
- (ii) U.S. Base Rate plus 2.00%; or
- (iii) U.S. Prime Rate plus 2.00%

Under the Term Facility, the cost of borrowing in U.S. Base Rate or U.S. Prime Rate cannot be lower than the cost of borrowing in LIBOR.

In the event that Bombardier Recreational Products Inc. has an excess cash position at the end of the fiscal year and its leverage ratio reaches certain threshold levels, the Company may be required to repay a portion of the Term Facility.

Austrian Term Loans

During the three-month period ended April 30, 2014, the Company entered into a term loan agreement at favourable interest rates under an Austrian government program. This program supports research and development projects based on the Company's incurred expenses in Austria. The term loan has a nominal amount of Euro 7.5 million (\$11.4 million) with an interest rate of 1.25% until June 30, 2017 and 1.75% from July 1, 2017 to its maturity date on December 31, 2019.

As at April 30, 2014, after taking into consideration this new loan, the Company had Euro 35.0 million outstanding nominal amounts under its eight Austrian term loans which bear interest at a range of 1.13% to 2.09% and mature between December 2014 and December 2019.

Consolidated Financial Position

The following table shows the main variances that have occurred in the consolidated financial position of the Company between January 31, 2014 and April 30, 2014, the impact of the fluctuation of exchange rates on such variance, the related net variance (excluding the impact of the fluctuation of exchange rates on such variance) as well as explanations for the net variance:

| (millions of Canadian dollars) | April 30, 2014 | January 31, 2014 | Variance | Exchange Rate Impact | Net Variance | Explanation |
|---|----------------|------------------|-----------|----------------------|--------------|---|
| Trade and other receivables | \$ 230.5 | \$ 266.6 | \$ (36.1) | \$ (2.7) | \$ (38.8) | Mostly explained by lower receivables related to Snowmobiles |
| Inventories | 631.1 | 532.7 | 98.4 | 0.1 | 98.5 | Mostly explained by higher finished products inventory of Seasonal and Year-Round Products |
| Property, plant and equipment | 518.2 | 515.3 | 2.9 | (0.6) | 2.3 | No significant variances |
| Trade payables and accruals | 588.5 | 547.0 | 41.5 | — | 41.5 | Mostly explained by the increased inventory level |
| Long-term debt, including current portion | 895.1 | 889.9 | 5.2 | 11.8 | 17.0 | Mostly explained by the new Austrian term loan |
| Employee future benefit liabilities | 211.4 | 203.0 | 8.4 | (1.1) | 7.3 | Mostly explained by the decrease of approximately 20 basis points in the discount rate on Canadian and Austrian defined benefit pension plans obligations partly offset by increased fair value of Canadian plan assets |

Off-Balance Sheet Arrangements

Dealer and Distributor Financing Arrangements

The Company, most of its independent dealers and some of its independent distributors are parties to agreements with third-party financing service providers. These agreements provide financing to facilitate the purchase of the Company's products and improve the Company's working capital by allowing an earlier collection of accounts receivable from dealers and distributors. Approximately two-thirds of the Company's sales are made under such agreements. The parties listed above have agreements with TCF Inventory Finance Inc. and TCF Commercial Finance Canada Inc. (collectively, "TCF"), to provide financing facilities in North America and Latin America, and with GE Commercial Distribution Finance and GE Commercial Corporation (collectively "GE Group") for financing facilities in Europe, Australia and New Zealand. The current agreement between the Company and TCF expires in 2019, while the contracts with GE Group can be terminated at any time, subject to a transition period of up to one year.

The total amount of financing provided to the Company's independent dealers and distributors totalled \$522.3 million for the three-month period ended April 30, 2014, compared to \$585.0 million for the three-month period ended April 30, 2013. The outstanding financing between the Company's independent dealers and distributors and third-party finance companies amounted to \$1,059.2 million and \$997.1 million as at April 30, 2014, and January 31, 2014, respectively.

The breakdown of outstanding amounts by country and local currency between the Company's independent dealers and distributors with third-party finance companies were as follows:

| (in millions) | Currency | April 30, 2014 | January 31, 2014 |
|--------------------------------|------------|-------------------|---------------------|
| Total outstanding as at | CAD | \$ 1,059 | \$ 997 |
| United States | USD | 657 | 589 |
| Canada | CAD | 265 | 267 |
| Europe | Euro | 28 | 28 |
| Australia and New Zealand | AUD | 27 | 32 |
| Latin America | USD | 3 | 3 |

The costs incurred by the Company under the dealers' and distributors' financing agreements totalled \$4.5 million for the three-month period ended April 30, 2014 compared with \$6.8 million for the three-month period ended April 30, 2013. The decrease is primarily due to lower volume of units sold.

Under the dealer and distributor financing agreements, in the event of default, the Company may be required to purchase, from the finance companies, new and unused products at the total unpaid principal balance of the dealer or distributor to the finance companies. In North America, the obligation is limited to the greater of U.S. \$25.0 million (\$27.4 million) or 10% of the last twelve-month average amount of financing outstanding under the financing agreements, whereas in Europe, the obligation is limited to the greater of Euro 10.0 million (\$15.2 million) or 10% of the last twelve-month average amount of financing outstanding under the financing agreements. In Australia and New Zealand, the obligation to purchase new and unused products represents the outstanding amount at the end of the periods. There is no purchase obligation for Latin America.

The maximum amount subject to the Company's obligation to purchase new and unused products from the finance companies was \$131 million as at April 30, 2014 (\$89 million in North America, \$15 million in Europe and \$27 million in Australia and New Zealand) and \$134 million as at January 31, 2014 (\$88 million in North America, \$15 million in Europe and \$31 million in Australia and New Zealand).

The Company did not incur significant losses related to new and unused products repossessed by the finance companies for three-month periods ended April 30, 2014 and 2013.

Consumer Financing Arrangements

The Company has contractual relationships with third-party financing companies in order to facilitate consumer credit for the purchase of its products in North America. The agreements allow the Company to offer under certain sales programs a subsidized interest rate to consumers for a certain limited period. In Canada, the Company has agreements with TD Financing Services and National Bank of Canada for such purposes. In the United States, the Company has agreements with Sheffield Financial and Capital One. Under these contracts, the Company's financial obligations are solely related to the commitments made under certain sales programs.

Transactions Between Related Parties

Transactions with the Principal Shareholders or their Affiliates

The Caisse de dépôt et placement du Québec ("CDPQ") participates in the Term Facility for an amount of \$66.1 million (U.S. \$60.3 million) and \$67.0 million (U.S. \$60.3 million) as at April 30, 2014 and January 31, 2014, respectively. The transactions with CDPQ were made on terms similar to those that have prevailed with other lenders.

Transactions with Bombardier Inc., a Company Related to Beaudier Group

Pursuant to the purchase agreement entered into in 2003 in connection with the acquisition of the recreational product business of Bombardier Inc., the Company is committed to reimburse to Bombardier Inc. income taxes amounting to \$21.6 million as at April 30 and January 31, 2014, respectively. The payments will begin when Bombardier Inc. starts making income tax payments in Canada and/or in the United States. The Company does not expect to make any payments to Bombardier Inc. in relation with that obligation for the year ending January 31, 2015.

Financial Instruments

The Company's financial instruments, divided into financial assets and financial liabilities, are measured at the end of each period at fair value or amortized costs using the effective interest method depending on their classification determined by IFRS. By nature, financial assets are exposed to credit risk whereas financial liabilities are exposed to liquidity risk. Additionally, the Company's financial instruments and transactions could be denominated in foreign currency creating a foreign exchange exposure that could be mitigated by the use of derivative financial instruments. The Company is to a lesser extent exposed to interest risk associated to its Revolving Credit Facilities, Term Facility and Austrian term loans.

Foreign Exchange Risk

The elements reported in the consolidated statements of net income, in the consolidated statements of financial position and in the consolidated statements of cash flows presented in the Company's unaudited condensed consolidated interim financial statements in Canadian dollars are significantly exposed to the fluctuation of exchange rates, mainly the Canadian dollar/U.S. dollar rate and the Canadian dollar/Euro rate.

The Company's cash inflows and outflows are mainly comprised of Canadian dollars, U.S. dollars and Euros. The Company intends to maintain, as a result of its business transactions, a certain offset position on U.S. dollars and Euros denominated cash inflows and outflows over a period of months.

For currencies over which the Company cannot achieve an offset through its recurring business transactions, mainly for the Australian dollar, the Swedish Krona and the Norwegian Krone, the Company uses foreign exchange contracts according to the Company's hedging policy. Under this policy, the Company hedges up to 50% of the budgeted exposure in these currencies during the annual budget period and continually increases the coverage up to 80% six months before the expected exposures arise. Management periodically reviews the relevant hedging position and may hedge at any level within the authorized parameters of the policy, up to the maximum percentage allowed. Those contracts are accounted for under the cash flow hedge model covering highly probable forecasted sales in these currencies and the gains or losses on those derivatives are recorded in net income only when the forecasted sales occur.

The Company does not hedge its exposure to the Brazilian Real.

Finally, the Company manages the exposure on its net income arising from the revaluation at period-end of U.S. dollar denominated trade payables and accruals and holdback program payments using foreign exchange contracts having the same inception and maturity dates. Those contracts are recorded in net income at each period end in order to compensate the gains or losses resulting from the revaluation at spot rate of these foreign-denominated liabilities.

While the Company's operating income is protected, to a certain extent, from significant fluctuations of foreign exchange rates due to Company's hedging strategy, the net income is significantly exposed to Canadian dollar/U.S. dollar rate fluctuations due to the U.S. dollar denominated long-term debt. However,

the Company's normalized net income does not take into account the foreign exchange (gain) loss on long-term debt.

Liquidity Risk

The Company is exposed to the risk of encountering difficulty in meeting obligations related to its financial liabilities. In order to manage its liquidity risk accurately, the Company continuously monitor its operating cash requirements taking into account the seasonality of the Company's working capital needs, revenues and expenses. The Company believes the cash flows generated from operations combined with its cash on hand and the availability of funds under its credit facilities ensures its financial flexibility and mitigates its liquidity risk.

Credit Risk

The Company could be exposed, in the normal course of business, to the potential inability of dealers, distributors and other business partners to meet their contractual obligations on financial assets, principally on receivables and amounts guaranteed under dealer and distributor financing arrangements with TCF and GE Group.

The Company considers that its credit risk associated with its trade receivables and its limited responsibilities under the dealer and distributor financing agreements with TCF and GE Group does not represent a significant concentration of risk due to the large number of dealers, distributors and other business partners and their dispersion across many geographic areas. Moreover, the Company actively monitors the credit of independent dealers' and distributor, in cooperation with third-party service providers for those dealers and distributors under the financing agreements.

Interest Rate Risk

The Company is exposed to the variation of interest rates mainly resulting from the LIBOR on its Term Facility. Due to current LIBOR rates level and the current low volatility environment, while taking into account the LIBOR floor rate on the Term Facility, the Company does not believe to be significantly exposed to increased interest rates in the short-term.

Critical Accounting Estimates

Significant Estimates and Judgments

The preparation of the unaudited condensed consolidated interim financial statements in accordance with the Company's accounting policies requires management to make estimates and judgments that can affect the reported amounts of assets and liabilities, related amounts of revenues and expenses, other comprehensive income and disclosures made.

The Company's best estimates are based on the information, facts and circumstances available at the time estimates are made. Management uses historical experience and information, general economic conditions and trends, as well as assumptions regarding probable future outcomes as the basis for determining estimates. Estimates and their underlying assumptions are reviewed periodically and the effects of any changes are recognized immediately. Actual results could differ from the estimates used and such differences could be significant.

The Company's annual operating budget and operating budget revisions performed during the year (collectively "Budget") and the Company's strategic plan comprise fundamental information used as a basis for some significant estimates necessary to prepare the unaudited condensed consolidated interim financial statements. Management prepares the annual operating budget and strategic plan each year using a process whereby a detailed one-year budget and three-year strategic plan are prepared by each entity and then consolidated.

Cash flows and profitability included in the Budget are based on the existing and future expected sales orders, general market conditions, current cost structures, anticipated cost variations and current agreements with third parties. Management uses the annual operating budget information as well as

additional projections or assumptions to derive the expected results for the strategic plan and periods thereafter.

The Budget is approved by senior management and the Board of Directors whereas the strategic plan is approved by senior management and presented to the Board of Directors. Management then tracks performance as compared to the Budget. Significant variances in actual performance are a key trigger to assess whether certain estimates used in the preparation of financial information must be revised.

Management needs to rely on estimates in order to apply Company's accounting policies and considers that the most critical ones are the following:

Estimating the Net Realizable Value of Inventory

The net realizable value of materials and work in process is determined by comparing inventory components and value with production needs, current and future product features, expected production costs to be incurred and the expected profitability of finished products, all based on Budget information. The net realizable value of finished products and parts and accessories is determined by comparing inventory components and value with Budget sales prices, sales programs and new product features.

Estimating the Useful Life of Tooling

Tooling useful life is estimated by product line based on their expected physical life and on the expected life of the product platform they are related to.

Estimating Impairment on Property, Plant and Equipment and Intangible Assets

Management assesses the value in use of property, plant and equipment and intangible assets mainly at groups of cash generating unit ("CGU") level using a discounted cash flow approach by product line determined during the annual budget and strategic plan process. When the Company acquired the recreational products business from Bombardier Inc. in 2003, trademarks and goodwill were recorded as part of the business acquisition. As at April 30, 2014, the entire carrying amount of trademarks of \$151.1 million and \$114.7 million of the \$116.0 million carrying amount of goodwill were related to this transaction.

(i) Trademarks Impairment Test

For the purpose of impairment testing, Ski-Doo®, Sea-Doo® and Evinrude® trademarks are allocated to their respective CGU. The carrying amount of trademarks amounting to \$151.1 million is related to *Ski-Doo*, *Sea-Doo* and *Evinrude* for \$63.5 million, \$59.1 million and \$28.5 million respectively.

Recoverable Amount

The Company determines the recoverable amount of these trademarks separately using value-in-use calculation. Value in use uses cash flow projections from the Company's one-year budget and three-year strategic plan, with a terminal value calculated by discounting the final year in perpetuity. These figures are used as the basis for the key assumptions in the value in use calculation that includes sales volume, sales price, production costs, distribution costs and operating expenses as well as discount rates. This information represents the best available information as at the date of impairment testing. The estimated future cash flows were discounted to their present value. The Company performed sensitivity analysis on the cash flows and growth rate in order to confirm that the trademarks were not impaired.

(ii) Goodwill Impairment Test

For the purpose of impairment testing, goodwill of \$114.7 million created in 2003 was allocated to the group of CGU representing all the product line CGUs.

Recoverable Amount

The group of CGUs' recoverable amount is based on a value-in-use calculation using cash flow projections, which takes into account the Company's one-year budget and three-year strategic plan, with a terminal value calculated by discounting the final year in perpetuity. These figures are used as the basis for the key assumptions in the value in use calculation that includes sales volume, sales price, production

costs, distribution costs and operating expenses as well as discount rates. This information represents the best available information as at the date of impairment testing. The estimated future cash flows were discounted to their present value. The Company performed sensitivity analysis on the cash flows and growth rate in order to confirm that goodwill was not impaired.

Estimating Recoverability of Deferred Tax Assets

Deferred tax assets are recognized only if management believes it is probable that they will be realized based on annual budget, strategic plan and additional projections to derive the expected results for the periods thereafter.

Estimating Provisions for Product Warranty, Product Liability, Sales Programs and Restructuring

The warranty cost is established by product and recorded at the time of sale based on management's best estimate, using historical cost rates and trends. Adjustments to the warranty provision are made when the Company identifies a significant and recurring issue on products sold or when costs and trend differences are identified in the analysis of warranty claims.

The product liability provision at period end is based on management's best estimate of the amounts necessary to resolve existing claims. In addition, the product liability provision at period end includes incurred, but not reported claims based on average historical cost information.

Sales programs provision is estimated based on current program features, historical data and expected retail sales for each product line.

Restructuring provision is initially estimated based on restructuring plan estimated costs in relation with the plan features approved by management. Restructuring provision is reviewed at each period end in order to take into account updated information in relation with the realization of the plan. If necessary, the provision is adjusted accordingly.

Estimating the Fair Value of Redeemable Common Shares Outstanding Before the IPO

The fair value of the redeemable common shares outstanding before the IPO was based on an average of two valuation methods of the underlying shares, which were the income and the market approaches. The income approach indicates the fair value of a company based on the present value of the cash flows that the company can be expected to generate in the future. This approach was applied through a discounted cash flow analysis based on the Company's budget and strategic plan. The market approach indicates the fair value of a company based on a comparison of comparable companies in similar lines of business that were publicly traded. The valuations performed by the Company were validated by a third-party valuation firm contracted by the Company and were used as a basis for calculating the liability associated with the redeemable common shares. Following the closing of the IPO of subordinate voting shares, the Company no longer has any redeemable common shares outstanding.

As at April 30, 2013, and until their exchange in the context of the IPO, the redeemable common shares fair value was the IPO price of the Company's subordinate voting shares which represented the most advantageous market for these shares at that date.

Estimating the Discount Rates Used in Assessing Defined Benefit Plan Expenses and Liability

In order to select the discount rates used to determine defined benefit plan expenses and liabilities, management consults with external actuarial firms to provide commonly used and applicable discount rates that are based on the yield of high quality corporate fixed income investments with cash flows that match expected benefit payments for each defined benefit plan. Management uses its knowledge and comprehension of general economic factors in order to conclude on the accuracy of the discount rates used.

Significant Judgments in Applying the Company's Accounting Policies

Management needs to make certain judgments in order to apply the Company's accounting policies and the most significant ones are the following:

Impairment of Property, Plant and Equipment and Intangible Assets

The Company operates using a high level of integration and interdependency between design, development, manufacturing and distribution operations. The cash inflows generated by each product line require the use of various assets of the Company, limiting the impairment testing to be done for a single asset or a single CGU. Therefore, management estimates impairment testing by grouping CGUs.

Functional Currency

The Company operates worldwide but its design, development, manufacturing and distribution operations are highly integrated, which require significant judgements from management in order to determine the functional currency of each entity using factors provided by IAS 21 "The Effects of Changes in Foreign Exchange Rates". Management established an accounting method where the functional currency of each entity is deemed to be its local currency unless the assessment of the criteria established by IAS 21 to assess the functional currency leads to the determination of another currency. IAS 21 criteria are reviewed annually for each entity and are based on transactions with third-parties only.

Changes in Accounting Policies

IAS 36 Impairment of Assets

On February 1st, 2014, the Company adopted the amendment to IAS 36 "Impairment of Assets" which provides guidance on recoverable amount disclosures for non-financial assets. The adoption of this amendment had no impact on the Company's condensed consolidated interim financial statements.

IAS 32 Financial Instruments: Presentation

On February 1st, 2014, the Company adopted the amendment to IAS 32 "Financial Instruments: Presentation" which clarifies the requirements for offsetting financial assets and financial liabilities. The adoption of this amendment had no impact on the Company's condensed consolidated interim financial statements.

IFRIC 21 Levies

On February 1st, 2014, the Company adopted IFRIC 21 "Levies" which identifies the obligation event for the recognition of a liability for a levy imposed by a government and provides guidance on when to recognize the liability. The adoption of this amendment had no impact on the Company's condensed consolidated interim financial statements.

Future Accounting Changes

In November 2009 and October 2010, the IASB issued *IFRS 9 “Financial Instruments”* representing the first phase of the IASB’s three phase project to replace *IAS 39 “Financial Instruments: Recognition and Measurement”*. The first phase defines the accounting of financial instruments that mainly requires the measurement at either the amortized cost or the fair value. The effective date of IFRS 9 for the Company is February 1st, 2018.

On May 28, 2014, the IASB issued *IFRS 15 “Revenue from Contracts with Customers”*. The objective of this standard is to remove inconsistencies and weaknesses in existing revenue recognition standards by providing clear principles for revenue recognition. The effective date of IFRS 15 for the Company is February 1st, 2017.

The IASB issued other standards which are not expected to have a significant impact on the Company’s financial statements.

Controls and Procedures

Management’s report on internal controls over financial reporting

There were no changes in our internal controls over financial reporting during the three-month period ended April 30, 2014, that have materially affected, or are reasonably likely to materially affect our internal controls over financial reporting.

Dividend Policy

The Company currently intends to use its earnings to finance the expansion of its business and to reduce indebtedness. Any future determination to pay dividends on the shares of the Company would be at the discretion of the board of directors of the Company (the “Board of Directors”) and would depend on, among other things, the Company’s results of operations, current and anticipated cash requirements and surplus, financial condition, contractual restrictions and financing agreement covenants (including restrictions in the Term Credit Agreement and the Revolving Credit Agreement or other material agreements), solvency tests imposed by corporate law and other factors that the Board of Directors may deem relevant.

Risk Factors

For a detailed description of risk factors associated with the Company, refer to the “Risk factors” section of the Company’s MD&A for the fourth quarter and the fiscal year ended January 31, 2014. The company is not aware of any significant changes to the Company’s risk factors from those disclosed at that time.

Disclosure of Outstanding Shares

As at June 11, 2014, the Company had the following issued and outstanding shares and stock options:

- 79,023,344 multiple voting shares with no par value.
- 39,271,386 subordinate voting shares with no par value.
- 1,620,770 options to acquire subordinate voting shares.
